RE: Supply Chain Concerns After Earthquake & Tsunami in Japan

To Our Valued Customers:

With the recent catastrophic earthquake and tsunami in Japan, Brown Metals Company has received several requests questioning how these events will affect our supply chain. Brown Metals Company does not purchase material from sources that rely on suppliers or supply from Japan. Brown Metals Company only purchases material rolled in the United States; therefore, our supply chain continues to remain in tact and should continue to operate as expected. If you have any further questions, please contact a member of the Brown Metals Company Sales Team.

Sincerely,

A handwritten signature in blue ink, appearing to read "Justin Lasley".
