RE: REACH (Registration, Evaluation, Authorization and restriction of Chemicals)

Dear Valued Customer:

Registration, Evaluation, Authorization and restriction of Chemicals, or REACH, consists of legislative framework developed by the European Union to manage the risks that chemicals may pose to human health and the environment. This framework requires industry to register chemicals used in their products with the European Chemicals Agency (ECHA).

Brown Metals Company does not manufacture any of the products sold, but rather distributes the products while providing value added services such as slitting, shearing, and edge conditioning. Our vendors continue to assess and monitor the REACH requirements as they pertain to the products we sell. As of this date, our vendors have determined that the products sold to Brown Metals Company do not contain any significant amounts of chemical compounds on the Candidate List of Substances of Very High Concern (SVHC) beyond allowable amounts. Brown Metals Company does not knowingly add any substances on the Candidate List of Substances of Very High Concern (SVHC) beyond allowable amounts. Therefore, these products are considered compliant with European Union SVHC regulations.

We will continue to work with our vendors to determine how the REACH requirements will impact our business. When available, updated statements from our vendors will be posted on our website at www.brownmetals.com/compliance. Please visit our website to read or download these statements.

If you have further questions, please do not hesitate to contact us.

Best regards,

Lance Brown
President
