Contaminated or Radioactive Material Statement

Stainless steel strip products purchased by Brown Metals Company are melted and rolled in the United States by our mills in order to meet DFARS section 252.225-7014 (Preference for Domestic Specialty Metals). These products are RoHS (Restriction of Hazardous Substances) and REACH (Registration, Evaluation, Authorization and restriction of Chemicals) compliant. Each of the mills we purchase materials from have a radioactive material screening process in place to ensure radioactivity levels do not exceed background levels. Please visit our website, www.brownmetals.com, for a copy of statements provided by each vendor. Should you have any further questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Justin Lasley".

Justin Lasley
Chief Information Officer
